EDUCATION

Slippery Rock University of Pennsylvania

Aug 2021 – May 2025

B.S. in Computer Science

- **GPA:** 4.0
- **Related Coursework:** Data Structures & Algorithms, Software Engineering, Artificial Intelligence, Fundamentals of Database Systems, Computer Organization & Architecture, Advanced Programming Principles, Computer Networks

SKILLS

Programming Languages: Java, Python, C++, C#, HTML, CSS, JavaScript, TypeScript, SQL, R, Kotlin

Frameworks & Libraries: Spring Boot, .NET (ASP.NET), React, Thymeleaf

Technologies & Concepts: REST APIs, Microservices, Docker, CI/CD Pipelines, OOP, TDD, Multithreading

Development Environments: Visual Studio Code, Eclipse IDE, IntelliJ IDEA, Jupyter Notebook, Linux

Tools & Methodologies: Agile (Scrum, Kanban), Git, GitHub, JUnit, JSON, UML, Maven, Gradle

Cloud & Databases: AWS (EC2, S3), MySQL, PostgreSQL

EXPERIENCE

Lowe's Companies, Inc.

Jan 2026 – Present

Associate Software Engineer – Charlotte, NC

- Completed an intensive 8-week software engineering bootcamp focused on full-stack enterprise development, with a strong emphasis on test-driven development (maintaining a minimum of 90% test coverage through development)
- Designed and built an MVP application based on predefined requirements, and presented the final product demonstrating design designs, functionality, and test coverage.
- Assigned to a Transportation Management System (TMS) team, preparing to contribute to production-level software in an Agile environment

Independent Contractor

Dec 2024 – Sept 2025

Software Engineer – Remote

- Built a full-stack Spring Boot application to streamline evaluation processes, implementing report generation by aggregating feedback from 4+ reviewees per employee
- Developed modular backend components including notifications, error handling, role-based access, and dynamic dashboards using OOP and design patterns (Singleton, Strategy, Factory)
- Deployed application to an Apache Tomcat server, ensuring solid performance in a simulated enterprise environment

FedEx Ground

Jun 2021 – Aug 2024

Package Handler – Evans City, PA

- Worked with team members to meet tight deadlines and maintain smooth operations during peak demand periods

PROJECTS

Furhat Robot Assistant

Jan 2025 – May 2025

- Developed an AI-powered conversational assistant using Furhat Robotics and a locally hosted LLM, with a Kotlin-based dialogue system for improved contextual understanding
- Scraped and structured 100+ academic catalog pages and built a React.js frontend to support interactive exploration of courses and degree pathways
- Designed and implemented state management flows to improve response accuracy for both direct and open-ended student queries

Interactive Discord Bot

May 2024 – Aug 2024

- Built a dynamic Discord bot in Python featuring games, utilities, and moderation tools to improve server engagement
- Implemented a virtual currency system with 10,000+ transactions and integrated MySQL for persistent storage of balances, cooldowns, and user statistics

CERTIFICATIONS

Meta React Specialization

Aug 2025 - Sep 2025

- Gained hands-on experience with component architecture, state management, hooks, and core React fundamentals

Google Project Management: Professional Certificate

Dec 2024 – Feb 2025

- Developed proficiency in Agile and Scrum methodologies, project planning, and risk management
